Dewan Bandaraya Kuala Lumpur
Tingkat 27, Bangunan Dewan Bandaraya
Jalan Raja Laut , 50350 KUALA LUMPUR

Dear Sirs,

**Threat to Public Safety Due to Proposed Development on Bukit Gasing by
*Sanctuary Gasing***

We, the below mentioned residents and/or property owners of the areas surrounding Bukit Gasing, strenuously object against the proposed development on Gasing Hill by *Sanctuary Gasing* because it poses a clear and present danger for our safety and the safety of families and properties.

The above proposed development is situated at an extremely dangerous position on a steep hill above where we live and a reservoir with 21 million gallons of water which is situated on top of the hill. Further, Bukit Gasing is well-established as one of the last remaining green lungs of Petaling Jaya and Kuala Lumpur. It should be untouched.

We appoint and mandate the *Joint Action Committee for Bukit Gasing* to represent us in this matter and that residents and the committee be given the right to be heard and consulted prior to any approval being granted or any development order issued in relation to the above project. We ask that we and/or our representatives be given access to all documentation in relation to the proposed development project, including those which have been submitted by the developer.

We urge you to act and to protect the lives of residents, which will be endangered by the project.

Thank you.

Yours sincerely,

.....
